

Aims the Very First Moon Landing

『LUNAR DREAM CAPSULE PROJECT』

Reschedule Launch To Load Latest Technology To The Lander

TOKYO-LUNAR DREAM Executive Committee, which is constructed from Otsuka Pharmaceutical Co., Ltd., Global Space Industry Company ASTROSCALE PTE. LTD. (Singapore), Space Development Company Astrobotic Technology, Inc (U.S.), has announced to reschedule the launch date of “LUNAR DREAM CAPSULE PROJECT” (LUNAR PROJECT) from October 2015 to second-half of 2016, with the target goal of summer 2016, due to the finding of the possibility of a more safety secured technology to be loaded.

With this new technology the performance of engine for the unmanned space ship (Lander) loaded with the Dream Capsule, will be upgraded and more precise landing on the moon will be possible.

With the rescheduling the date of launch, the messages will be gathered for a longer time. The detailed schedule will be announced as specific dates are decided.
